## PROFILE

I graduated from a top graphic art school in France and have a keen interest in design and ergonomic solutions. I'm adept with pixel perfect, grid addict and a broad array of design softwares.

During my eight years experience I've developed an efficient working method that adheres to web standards (W3C). Throughout my career to date, I've worked on many projects for many different clients like L'Oréal Paris, Kerastase, Tag Heuer, Yves Saint Laurent... Each one of these allowed me to develop my professionalism, independent thinking and ability to learn new knowledge.
